Personal Responsibility Education Program (PREP)

Ohio PREP Region 9, Nationwide Children's Hospital, placed the PREP curriculum in a Prezi format which is a visual presentation software and an alternative to slide-based displays.

Two Region 6 agencies, Pathway Caring for Children (Stark County) and Trumbull County Juvenile Justice Center are also utilizing Prezi

while providing the PREP curriculum to their youth classes. The youth appear more engaged, as Prezi provides a visual account and overview of PREP, in addition to the student manuals and role playing. The instructors who have used the program describe it as helpful and easy to use. They have also noticed an increase in youth participation.

Annita Justice, with Pathway Caring for Children, using Prezi visual software while instructing the youth in PREP.

Curriculum Changes

The PREP curriculum has been updated. Reducing the Risk (RTR) has a revised 5th edition and the financial literacy and career building modules have been expanded. Direct care staff already trained in the current PREP curriculum will need to attend a 6 hour "update" training. If you have not been trained on the updated information, please contact Molly Malloy at (330) 489-3322 or mmalloy@cantonhealth.org.

Ohio PREP is Funded by The Department of Health and Human Services, Administration on Children, Youth and Families (ACYF), Family and Youth Service Bureau and Administered by the Ohio Department of Health Office of Health Improvement and Wellness, Bureau of Maternal, Child and Family Health, School and Adolescent Health Program.

Suicide Prevention

Suicide is a serious public health problem that can have lasting harmful effects on individuals, families, and communities. While its causes are complex and determined by multiple factors, the goal of suicide prevention is simple: Reduce factors that increase risk (i.e. risk factors) and increase factors that promote resilience (i.e. protective factors). Ideally, prevention addresses all levels of influence: individual, relationship, community, and societal. Effective prevention strategies are needed to promote awareness of suicide and encourage a commitment to social change.

Preventing Suicide in Youth and Adolescents

Presented By: Allison Esber, MSSA, LSW, OCPSA

The suicide rate among youth and adolescents has dramatically increased, becoming a high priority population in suicide prevention. This presentation will focus on preventing suicide in youth by providing local, state, and national statistics; recognizing warning signs and symptoms in individuals and high risk populations; and providing resources to individuals in need of treatment or further support.

Allison Esber is the Systems Initiative Manager at Stark County Mental Health and Addiction Recovery (StarkMHAR). She serves as the coordinator for the Stark County Suicide Prevention Coalition working to decrease the number of suicide deaths by raising awareness and educating the community regarding suicide prevention. Allison coordinates the Stark County Opiate Task Force to address the opiate epidemic. Through her work at StarkMHAR, she also assists the Drug Free Stark County coalition and serves as the adult advisor for Stark County youth led prevention.

Prior to her work at StarkMHAR, she worked for a crisis center. Allison assisted in the implementation of the Project DAWN pilot program in Stark County. Allison is a licensed social worker and a certified prevention specialist assistant. She is an instructor for Youth Mental Health First Aid, QPR (Question. Persuade. Refer.) and CALM (Counseling on Access to Lethal Means), both suicide prevention gatekeeper trainings.

Wednesday, June 28, 2017

11:30 a.m.-1:30 p.m.

Stark County District Library (McKinley Room)

715 Market Ave N.

Canton, Ohio 44702
