Stark County Health Department

Stark County, Ohio

All data contained is preliminary and is subject to change as more information is reported to Ohio Department of Health (ODH). Data presented in this document is based on data as of 12.18.2020 11:30 am (for Stark County data) and/or 2:00pm (for Ohio data). Cases from previous days are likely to change as more information is entered. Caution should be exercised as data is subject to change. Numbers may differ from ODH depending on time data was accessed.

# Illness Information for Stark County Confirmed Cases-Cumulative Counts

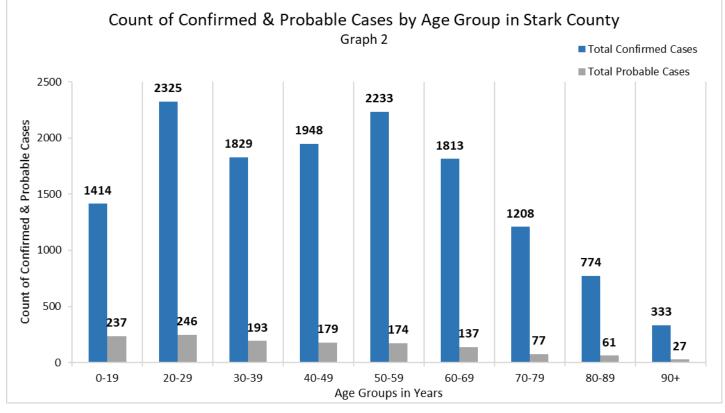

Hospitalized		
Yes	1,016	6.3%
No	14,974	92.8%
Unknown	151	0.9%

If hospitalized, in ICU?		
Yes	117	12%
No	899	88%

Discharged from Hospital				
ICU	82			
Other	Other 414			
Some o	Some cases may be discharged due to death.			

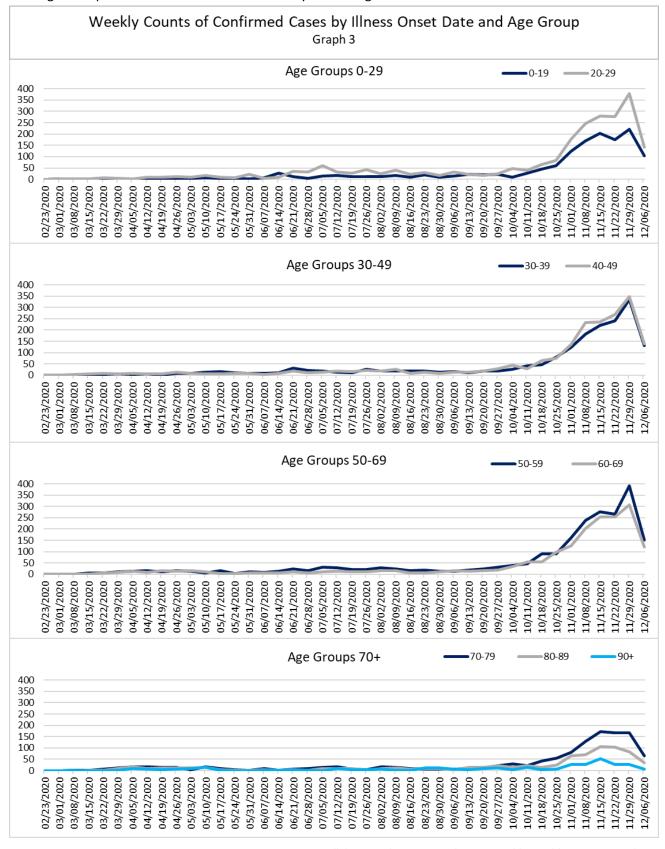

Graph 1 shows the incidence of signs and symptoms reported in documented symptomatic confirmed cases. Cases that have no symptoms documented or are documented asymptomatic are not included. We have combined fever (documented > 100.4) &subjective fever. This is due to recognizing that everyone does not own a thermometer and therefore cannot give an actual temperature to flag the indicator. We are hoping these changes will provide a clearer picture regarding symptoms present.

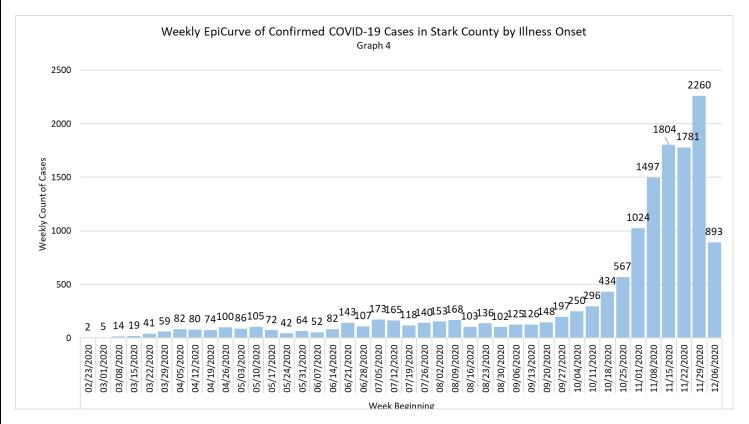

This graph was updated 12/1/2020. A breakdown of deaths by age is now on page 6 as Graph 7. Graph 2 shows the cumulative number of laboratory-confirmed and probable cases by age group. There are 19 probable cases and 12 confirmed cases in which date of birth is currently unknown and not shown in graph above.

Graph 3 shows a breakdown of confirmed cases by week by age groups. There are 12 confirmed cases in which date of birth is currently unknown and not shown in graph below. As with all data contained in this report, caution is advised when looking at the past 2-3 weeks of data due to delays in testing results.

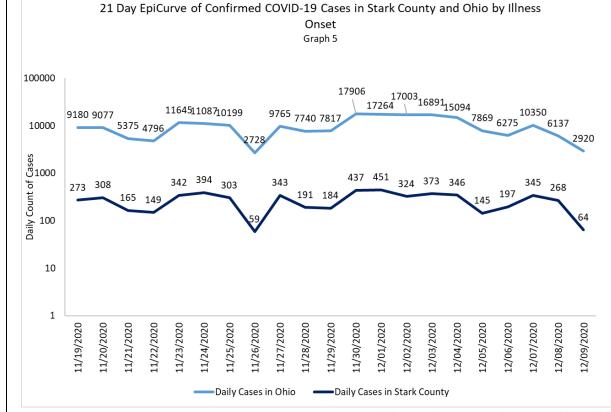

A joint collaboration between Stark County Public Health Agencies Final 12.18.2020

 $P_{age}4$ 

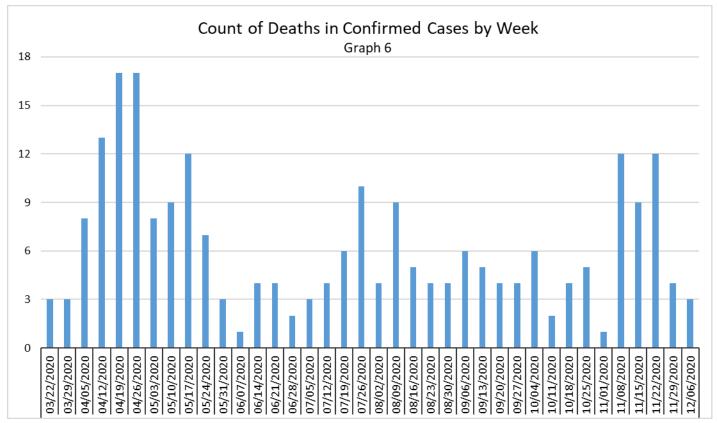

Graph 4 shows the EpiCurve which displays the total number of laboratory-confirmed cases per week, based on the illness onset date for Stark County. If the illness onset date is not available, the earliest known date is utilized, which could be the date the specimen was collected, the date of the test results or the date reported to the local health department. Counts will change as additional information is collected. Stark County's first confirmed case reported an

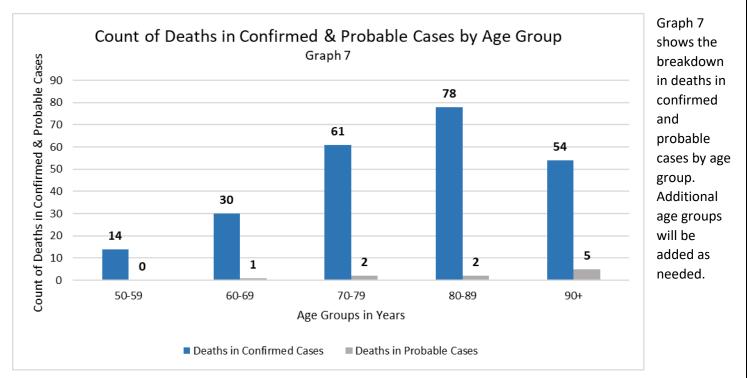

illness onset date of 2/25/2020. This data only includes data up until 11:30 am on 12/18/2020.

To help highlight short-term daily changes, Graph 5 shows daily counts of laboratory confirmed cases for a 21-day period.

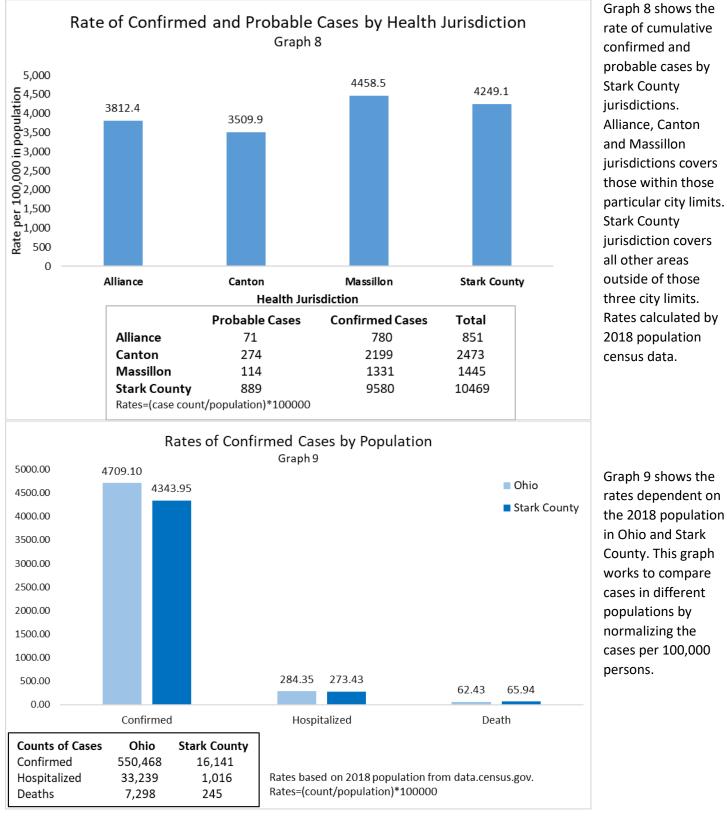

Page

Graph 6 is a breakdown of death counts in laboratory-confirmed cases by week in which the death occurred. Includes only deaths reported to the local health department as of 11:30 am on 12/18/2020. This isn't an automated process which is why it may be a week or longer for a death to be documented.

 ${}^{\sf Page}6$ 

- Ohio's rate of laboratory confirmed cases is 1.1x higher than those in Stark County.
- Ohio's rate of laboratory confirmed cases who require hospitalization is 1.0x higher than Stark County's rate.
- Stark County's rate of death due to COVID-19 complications is 1.1x higher than Ohio's rate.

A joint collaboration between Stark County Public Health Agencies Final 12.18.2020

Page

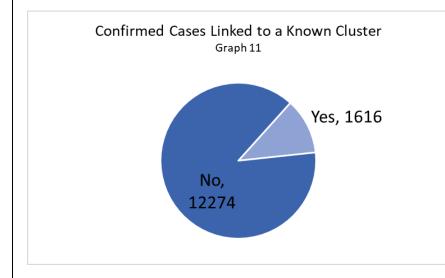

Graph 10 is the count of confirmed cases closed or closed due to death. Stark County has a total of 4584 cases closed of which 237 (5.2%) are due to death.

Cases can be closed for the following reasons:

- The person passed away. Can be either COVID-related or not COVID-related.
  - Symptoms have resolved in that case.

• The person is no longer being followed by the local health department.

A cluster is defined as 2 or more cases with a common time and place of exposure. In Stark County, commonly these are work place, congregate living or family event/party settings. Additionally, cases that were exposed to original case members of the cluster and they subsequently became ill are also then linked to the original cluster.

We have removed the graph associated with health care workers and long-term care facilities. For more information on long-term care facilities including breakdown by facility and by resident/staff, please visit: <a href="https://coronavirus.ohio.gov/wps/portal/gov/covid-19/dashboards/long-term-care-facilities/cases">https://coronavirus.ohio.gov/wps/portal/gov/covid-19/dashboards/long-term-care-facilities/cases</a> <a href="https://coronavirus.ohio.gov/wps/portal/gov/covid-19/dashboards/long-term-care-facilities/mortality">https://coronavirus.ohio.gov/wps/portal/gov/covid-19/dashboards/long-term-care-facilities/cases</a> <a href="https://coronavirus.ohio.gov/wps/portal/gov/covid-19/dashboards/long-term-care-facilities/mortality">https://coronavirus.ohio.gov/wps/portal/gov/covid-19/dashboards/long-term-care-facilities/cases</a>

Background from www.cdc.gov: Coronavirus disease 2019 (COVID-19) is a respiratory illness that can spread from person to person. The virus that causes COVID-19 is a novel coronavirus that was first identified during an investigation into an outbreak in Wuhan, China.

Confirmed

• Meets confirmatory laboratory evidence. NOTE: Asymptomatic infections are reportable as confirmed cases.

Probable

• Meets presumptive laboratory evidence AND was reported on or after November 1, 2020; OR

o For reports received prior to November 1, 2020: meets presumptive laboratory evidence AND either clinical criteria OR epidemiologic linkage; OR

• Meets clinical criteria AND epidemiologic linkage with no confirmatory laboratory testing performed for SARS-CoV-2; OR

• Meets vital records criteria with no confirmatory laboratory evidence for SARS-CoV-2.

Counts and rates are based on date of illness onset. If onset date is unknown, the earliest known date is utilized. Any rates based on counts less than 10 are considered unreliable and caution should be exercised when interpreting. Due to testing restrictions, data may be skewed. Report compiled by Canton City Public Health.
