

A joint collaboration between Stark County Public Health Agencies:

Alliance City Health Department

Canton City Public Health

Massillon City Health Department

Stark County Health Department

Stark County, Ohio

September 23, 2021 Epi Report

<p>COVID-19 Snapshot Stark County, Ohio as of 12:00pm September 23, 2021</p>	<p>September 9, 2021-September 22, 2021 Number of Confirmed & Probable Cases in Stark County 2901</p> <p>Rate per 100,000 in Stark County Population 782.8</p> <p>CDC Level of Community Transmission: High 9/15/2021-9/21/2021</p>
---	--

Confirmed Cases	Probable Cases	Hospitalized Confirmed & Probable Cases	Age Range
Total: 35,430	Total: 6,460	Yes: (includes ICU) 2,479	Confirmed Cases: <1-108
Active/Open Cases: 2,136	Active/Open Cases: 307	Yes, ICU: 165	Hospitalized in Confirmed Cases: <1-105
Closed: (includes Deaths) 33,294	Closed: (includes Deaths) 6,153	Discharged: 1,191	Deaths in Confirmed Cases: 21-108
Closed due to Death: 897	Closed due to Death: 147		

All data contained is preliminary and is subject to change as more information is reported to Ohio Department of Health (ODH). Data presented in this document is based on data as of 09/23/2021 12:00 pm (for Stark County data) and/or 2:00pm (for Ohio data). Cases from previous days are likely to change as more information is entered. Caution should be exercised as data is subject to change. Numbers may differ from ODH depending on time data was accessed.

Stark County Epi Situational Report - COVID-19

Table 1 as of: 09/23/2021 12:00PM

Next report scheduled: 09/30/2021

Cases Reported to Stark LHDs		
Data from 6/23/2021-9/23/2021 (12-weeks)		
Positive/Confirmed	7,176	
Hospitalized	373	5.20%
ICU Admissions	4	0.06%
Deaths in Confirmed Cases	41	0.57%
Probable Cases	1,245	
Deaths in Probable Cases	6	

Cases Reported to Stark LHDs		
Cumulative Data as of 09/23/2021 12:00		
Positive/Confirmed	35,430	
Hospitalized	2,406	6.79%
ICU Admissions	161	0.45%
Deaths in Confirmed Cases	897	2.53%
Probable Cases	6,460	
Deaths in Probable Cases	147	

Descriptive Statistics for Stark County Confirmed Cases: Data from 6/23/2021-9/23/2021

Gender			
	Confirmed Cases		Deaths
Male	3,299	46.0%	23
Female	3,868	53.9%	18
Unknown	9	0.1%	0
Total	7,176		41

Ethnicity			
	Hispanic	Non-Hisp	Unknown*
Count	97	4,423	2,656
%	1.4%	61.6%	37.0%

Race						
	White	Black	Asian/Pacific Islander	American Indian/Alaskan Native	Other	Unknown*
Count	4,171	571	37	11	193	2,193
%	58.1%	8.0%	0.5%	0.2%	2.7%	30.6%

*Unknown counts includes refused to answer responses

Hospitalization Information for Stark County Confirmed Cases-Cumulative Counts

Hospitalized			If hospitalized, in ICU?			Discharged from Hospital		
Yes	2,406	6.8%	Yes	161	7%	ICU	120	
No	30,502	86.1%	No	2,245	93%	Other	1038	
Unknown	2,522	7.1%					Some cases may be discharged due to death.	

Stark County Vaccination Update as of 9/23/2021

Current Vaccination Groups Eligible	Vaccine Started	Vaccine Completed
Persons aged 12 and over	Count: 185,233	Count: 172,100
	49.98% of population	46.44% of population

Count of Confirmed Cases by Age Group in Stark County-2021 only
Graph 1

Graph 1 shows the cumulative number of laboratory-confirmed cases by age group for 2021 only. There is 1 confirmed case in which date of birth is currently unknown and not shown in graph above.

Graph 2 shows a breakdown of confirmed cases by week by age groups. As with all data contained in this report, caution is advised when looking at the past 2-3 weeks of data due to delays in testing results. Only 12 weeks of data is shown in graphs below. Please be aware that all 4 graphs have differing y-axis (vertical axis) to best show differences in case counts from week to week.

Weekly Counts of Confirmed Cases by Illness Onset Date and Age Group
Graph 2

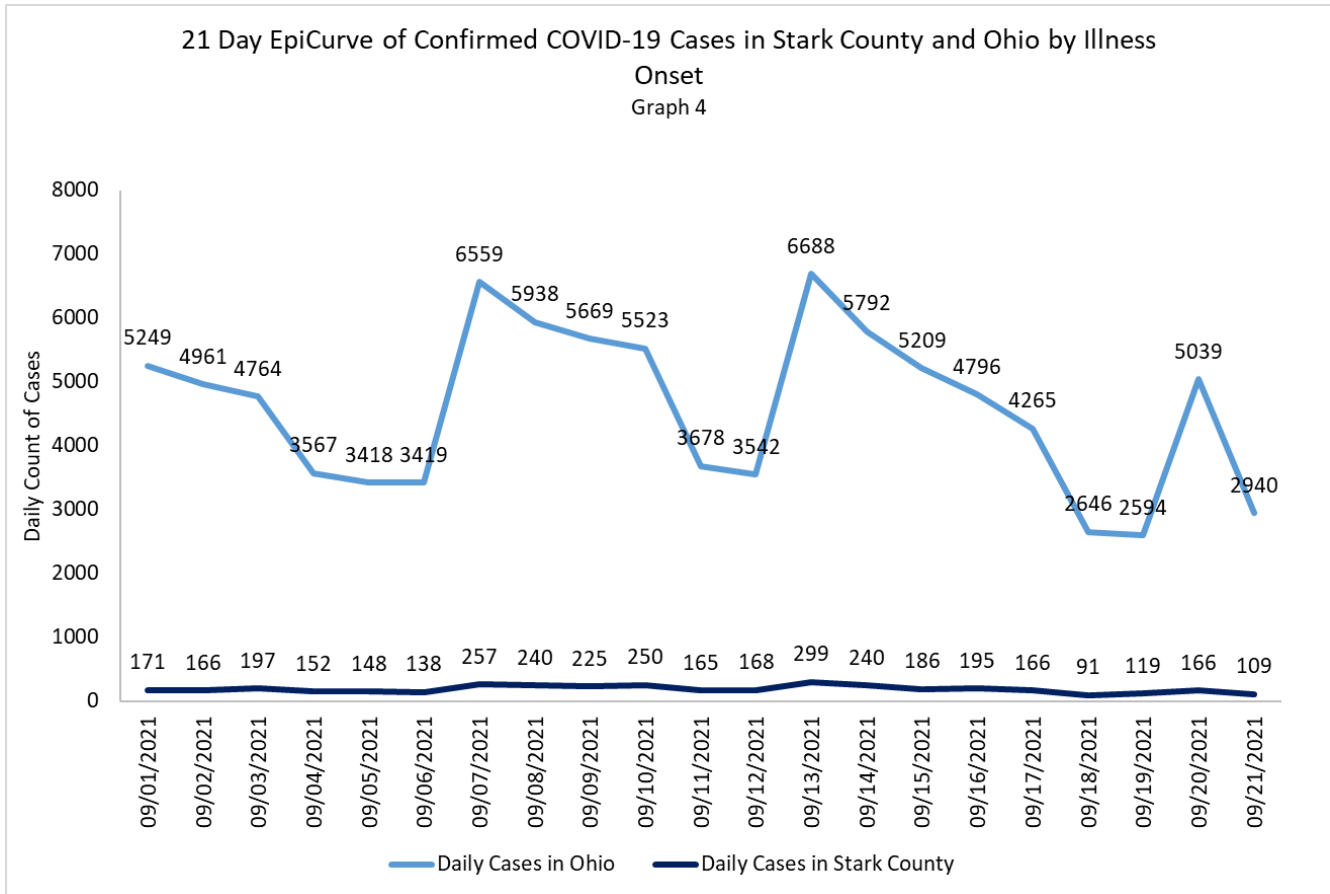

EPIDEMIOLOGICAL REPORT ON COVID-19

Graph 3 shows the EpiCurve which displays the total number of laboratory-confirmed cases per week, based on the illness onset date for Stark County. If the illness onset date is not available, the earliest known date is utilized, which could be the date the specimen was collected, the date of the test results or the date reported to the local health department. Counts will change as additional information is collected. Stark County’s first confirmed case reported an illness onset date of 2/25/2020 but graph only contains 52 weeks of data.

To help highlight short-term daily changes, Graph 4 shows daily counts of laboratory confirmed cases for a 21-day period.

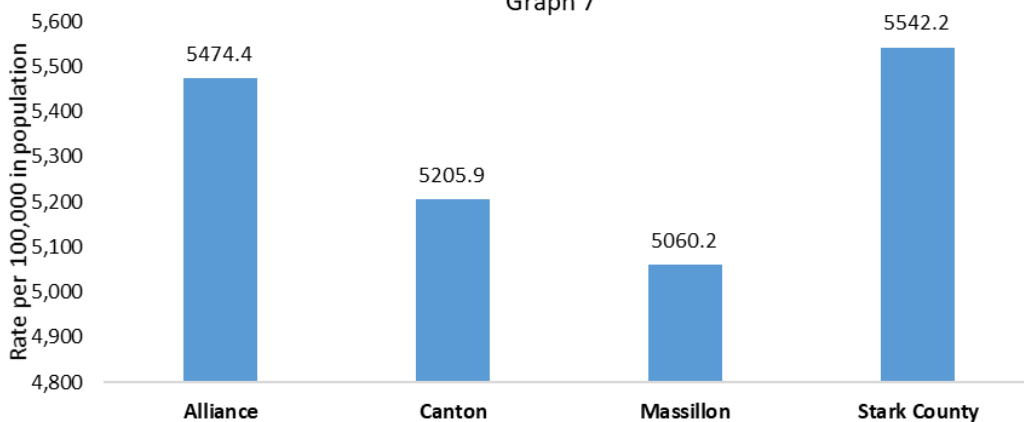

Graph 5 is a breakdown of death counts in laboratory-confirmed cases by week in which the death occurred. Includes only deaths reported to the local health department as of 12:30 pm on 9/23/2021. This isn't an automated process which is why it may be a week or longer for a death to be documented. **Please see last page of report for additional information regarding deaths.**

Graph 6 shows the breakdown in deaths in confirmed and probable cases by age group. Additional age groups will be added as needed.

Rate of Confirmed and Probable Cases by Health Jurisdiction-2021 only

Graph 7

Health Jurisdiction	Probable Cases	Confirmed Cases	Total
Alliance	166	1056	1222
Canton	760	2908	3668
Massillon	258	1382	1640
Stark County	3094	10561	13,655

Rates=(case count/population)*100000

***Graph updated since 6/2021. Only includes cases with illness onset in 2021.** Graph 7 shows the rate of cumulative confirmed and probable cases by Stark County jurisdictions. Alliance, Canton and Massillon jurisdictions covers those within those particular city limits. Stark County jurisdiction covers all other areas outside of those three city limits. Rates calculated by 2018 population census data.

Rates of Confirmed Cases by Population

Graph 8

Counts of Cases	Ohio	Stark County
Confirmed	1,127,647	35,430
Hospitalized	67,598	2,406
Deaths	21,596	897

Rates based on 2018 population from data.census.gov.
Rates=(count/population)*100000

Graph 8 shows the rates dependent on the 2018 population in Ohio and Stark County. This graph works to compare cases in different populations by normalizing the cases per 100,000 persons.

- Ohio’s rate of laboratory confirmed cases is 1.0x higher than those in Stark County.
- Stark County’s rate of laboratory confirmed cases who require hospitalization is 1.1x higher than Ohio’s rate.
- Stark County’s rate of death due to COVID-19 complications is 1.3x higher than Ohio’s rate.

To give health jurisdictions a clearer picture of cases within the 3 city limits and outside of those city limits, new graphs have been added. Graphs 9.1, 9.2, 9.3 are for each of the 3 city centers in Stark County. Graph 9.4 is for cases that occurred in residents outside of the 3 city limits. Please be aware that all 4 graphs have differing y-axis (vertical axis) to best show differences in case counts from week to week.

Weekly EpiCurve of Confirmed COVID-19 Cases in Massillon City by Illness Onset-2021
Graph 9.3

Weekly EpiCurve of Confirmed COVID-19 Cases outside 3 city limits by Illness Onset-2021
Graph 9.4

Background from www.cdc.gov: Coronavirus disease 2019 (COVID-19) is a respiratory illness that can spread from person to person. The virus that causes COVID-19 is a novel coronavirus that was first identified during an investigation into an outbreak in Wuhan, China.

Case definitions revised 9/22/2021

Confirmed

- Meets confirmatory laboratory evidence.
- o NOTES: Asymptomatic infections are reportable as confirmed cases. In some cases, a SARS-CoV-2 genomic sequencing result may be available without an associated positive PCR result. These records should be classified as a confirmed case; however, public health action may be limited as SARS-CoV-2 genomic sequencing assays are non-diagnostic tests and generally not CLIA-validated.

Probable

- Meets presumptive laboratory evidence AND was reported on or after November 1, 2020; OR
- o For reports received prior to November 1, 2020: meets presumptive laboratory evidence AND either clinical criteria OR epidemiologic linkage; OR
- Meets clinical criteria AND epidemiologic linkage with no confirmatory or presumptive laboratory testing performed for SARS-CoV-2; OR
- Meets vital records criteria with no confirmatory laboratory evidence for SARS-CoV-2.

Counts and rates are based on date of illness onset. If onset date is unknown, the earliest known date is utilized. Any rates based on counts less than 10 are considered unreliable and caution should be exercised when interpreting. Due to testing restrictions, data may be skewed. Report compiled by Canton City Public Health.

Data is sourced from: coronavirus.ohio.gov, ODH data warehouse, and census.gov. “These data were provided by the Ohio Department of Health. The Department specifically disclaims responsibility for any analyses, interpretations or conclusions.”

Beginning March 2, 2021, ODH changed from using Ohio Disease Reporting System (ODRS) for mortality data to utilizing Electronic Death Registration System (EDRS) data. This allows only deaths which have been verified by the CDC’s National Center for Health Statistics (NCHS) to be included on the ODH website. This data is not updated daily. For the time being, Stark County will continue to utilize mortality data for ODRS with the disclaimer that data is considered preliminary and subject to change.
